Installation Guide

1. Copy “supercheckout” module folder under your “root_directory/modules/” of your store via FTP or use prestashop interface to upload the plugin.
2. After copy, module will be listed on module listing page in admin panel as shown given below screen.

3. If module is not displaying on your module listing page, search it by filtering module with following details:

Keyword: Supercheckout

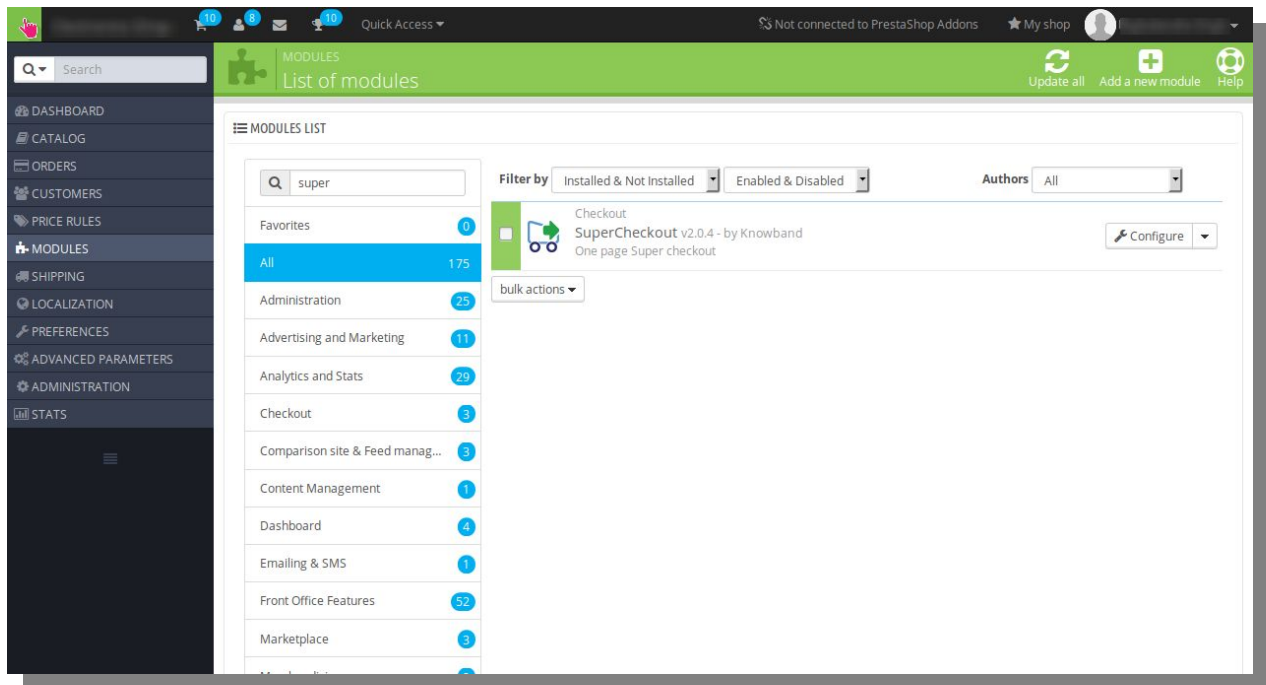

Author: Knowband

Category: Checkout

Filter by: Installed & Not Installed/Enabled & Disabled

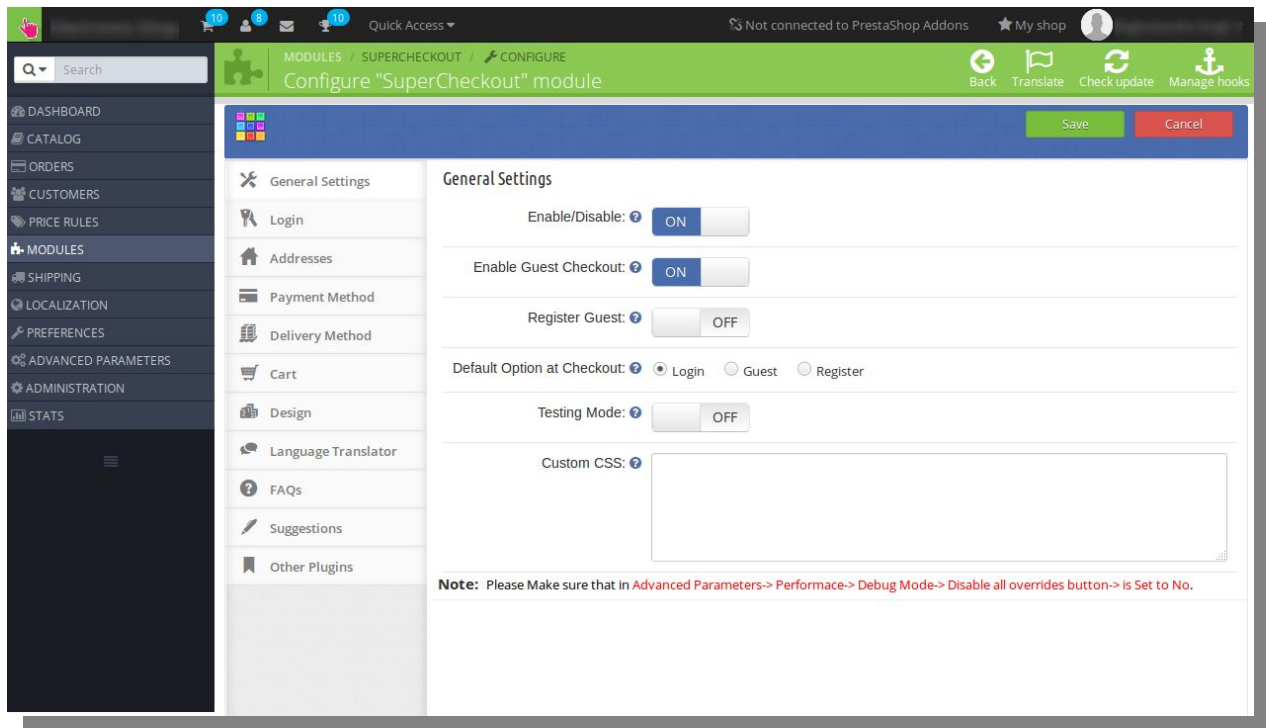

Note:

1. When you will click on install button, a pop up box will appear which will display warning messages. You can ignore these messages and move ahead. There will be no negative impact of this warning message on your store.
2. After installing module, a “configure” button will be in front of this plugin on module listing page as shown in screen below:

User Manual

1. To access this module, Click on “configure” button of supercheckout module. On clicking, module interface will be open and following screen will be display as given below:

General Settings

1. **Enable/Disable:** To enable the plugin, switch the enable button from OFF to ON. Default value will be “OFF” .
2. **Enable Guest Checkout:** By enabling this option, store will allow customer to checkout as a guest. Default value will be “OFF”
3. **Register Guest:** By enabling this option, store will register guest automatically and send registration email to corresponding customer. Default value will be “OFF” .
4. **Default Checkout Option:** There are 3 options which will be displayed at front end. With these options, admin can set which option will be displayed to customers on supercheckout page. These options are:
 - a. **Login:** If this option is selected, customer will see the login form in login section.
 - b. **Guest:** If this option is selected, customer will see only the email field in login section.
 - c. **Register:** If this option is selected, customer will see the registration form in login section.

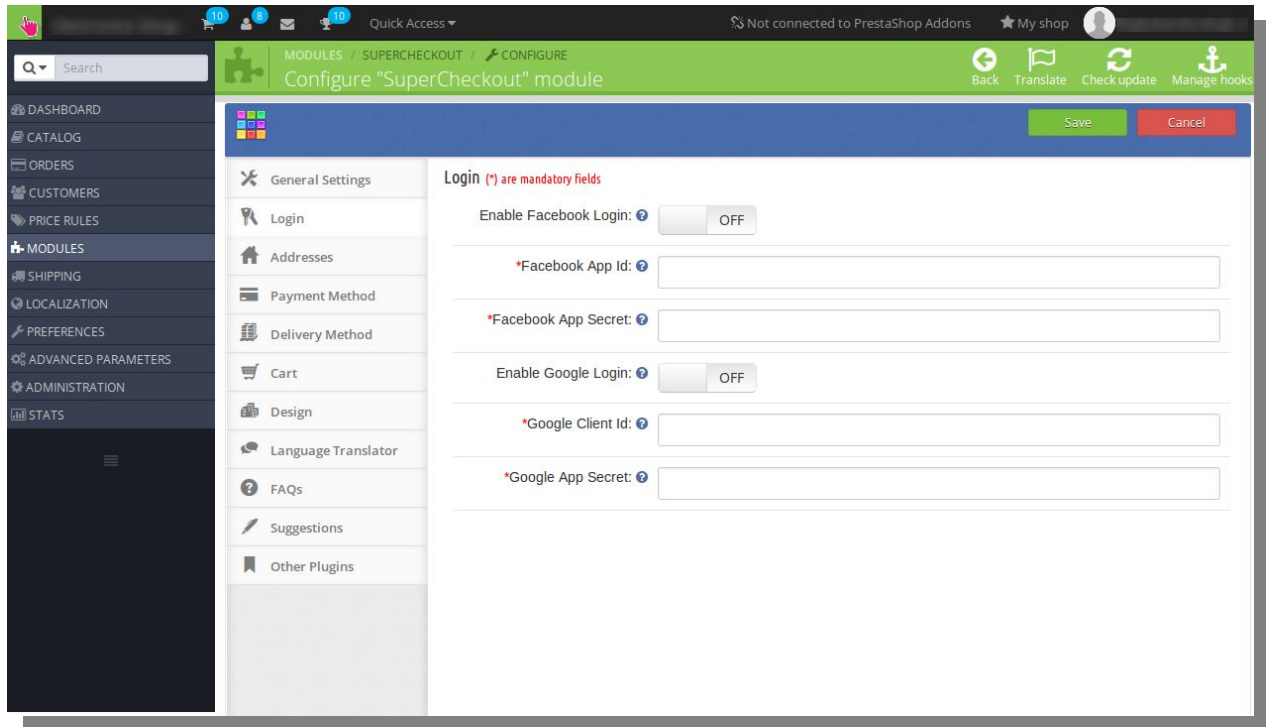

On front, customer can also change the checkout option. By default, “login” option will be selected.

5. **Testing Mode:** If you want to test the plugin before making it live on your store then you can enable this option. While this option is enabled your customers are redirected to the normal checkout page but you can open the SuperCheckout page directly through URL. The URL for the same appears below this option once you enable it.

6. **Custom CSS:** This option allows you to change the CSS of any element on front end (i.e. Supercheckout Page). To change the CSS of any element you need to write the CSS code for the same and add that code in the text area for this option.

Login Tab

1. This tab basically contains setting to enable /disable Facebook and Google registration & login as shown below.

2. **Enable Facebook Login:** To enable Facebook Registration & Login switch the button from OFF to ON. But before you do that do get facebook APP ID and APP SECRET from <http://developers.facebook.com> without these keys, this functionality will not work. By default, this functionality will be disabled.
3. **Enable Google Login:** To enable Google Registration & Login switch the button from OFF to ON. But before you do that do get Google APP ID, CLIENT ID and APP SECRET from <https://code.google.com/apis/console> without these keys, this functionality will not work. By default, this will be disabled.
4. Please read the Annexure A to setup [Google](#) and [Facebook](#) login.

MailChimp Tab

Introduction:

MailChimp is an email marketing service by which you can send bulk newsletter/offer emails to your customers. MailChimp also provides many attractive Templates and many more features. Our module allows you to add customer email directly to mailchimp list as soon as they register using our module.

For using MailChimp You need to have an Api Key.

Steps to Configure MailChimp :

1. Login to your MailChimp Account.
2. Click on the right corner tab > Choose Profile > Extras > API Keys.
3. Here Admin Can Create an API key by click on “Create a Key” Button.
4. Copy the API key.
5. Admin can also make Different list for Each Social login customer By click on “List ” in the Top Menu Bar.
6. Now Paste the API Key in the Provided Mailchimp Api Key Section and click on “Get List” Button.
7. Select the list from Dropdown menu.

MailChmp Settings:

1. **Enable/Disable:** To enable the Mailchimp, switch the enable button from OFF to ON. Default value will be “OFF” .
2. **Subscribe Customer Checkbox:** Check this option if you want to subscribe customers to mailchimp as soon as he comes out from email field. Please note that this function will not subscribe them to Prestashop list. Our mailchimp integration is responsible to subscribe only to mailchim list.
3. **MailChimp APi Key:** Enter Your MailChimp Api Key and Click on “Get List” Button .
- 4 . **MailChimp List:** Select your desired list and save settings.

Addresses Tab

1. This tab contains setting for the fields which is to be shown in customer registration, delivery address and invoice address section on front. As shown in screen below:

The screenshot displays the PrestaShop configuration interface for the 'SuperCheckout' module. The left sidebar contains a navigation menu with options like DASHBOARD, CATALOG, ORDERS, CUSTOMERS, PRICE RULES, MODULES, SHIPPING, LOCALIZATION, PREFERENCES, ADVANCED PARAMETERS, ADMINISTRATION, and STATS. The main content area is titled 'Configure "SuperCheckout" module' and includes a 'Save' button and a 'Cancel' button.

General Settings

- General Settings
- Login
- Addresses
- Payment Method
- Delivery Method
- Cart
- Design
- Language Translator
- FAQs
- Suggestions
- Other Plugins

FAQs Tab

This tab contains several questions (with answers to them) that are asked by our customers. We recommend you to go through the questions before raising any ticket for this plugin.

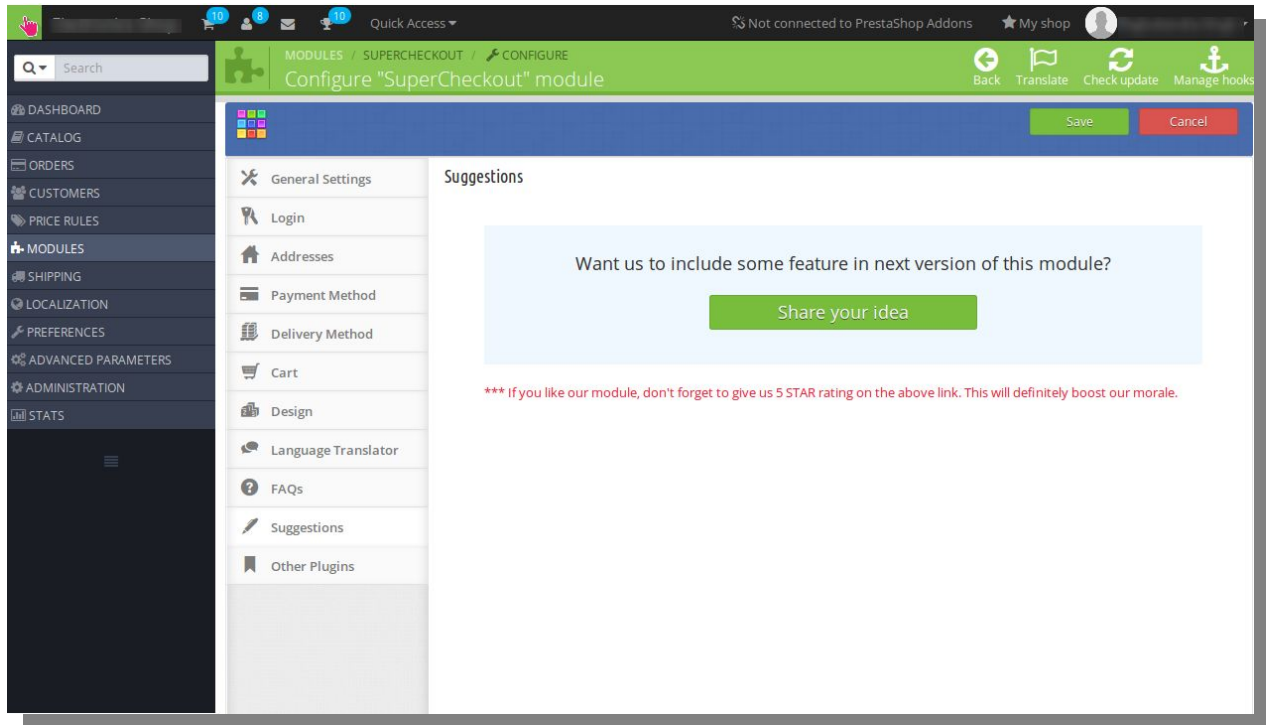

The screenshot shows the PrestaShop administration interface for the SuperCheckout module. The top navigation bar includes a search bar, a 'Quick Access' dropdown, and status indicators for 'Not connected to PrestaShop Addons' and 'My shop'. The left sidebar lists various modules like DASHBOARD, CATALOG, ORDERS, CUSTOMERS, PRICE RULES, MODULES, SHIPPING, LOCALIZATION, PREFERENCES, ADVANCED PARAMETERS, ADMINISTRATION, and STATS. The main content area is titled 'Configure "SuperCheckout" module' and features a 'Save' button and a 'Cancel' button. The 'FAQs' tab is selected in the left sidebar, displaying a list of frequently asked questions and their answers.

Frequently Asked Questions

- 1. One page Super Checkout module is installed and enabled but not coming in front-end.**
After installing and enabling our module, if you are still getting old checkout page of Prestashop, kindly clear Prestashop cache using Advance Parameter->Performace->Clear cache button and also ensure that testing mode is not enabled.
- 2. I am getting 500 Internal server error after enabling Super Checkout module.**
There is no specific reason for this error. In case you are getting this error, you need to contact us. Please don't forget to share admin and FTP login details.
- 3. I need to change button colors from Orange to something else, which file I need to edit?**
To change front-end button colors or anything else, you need to change CSS in following file.
/modules/supercheckout/views/css/front/supercheckout.css
If you want to add extra CSS, you cal also use "Custom CSS" field under general setting tab.

Suggestions Tab

In case you want to give any suggestions for some new features to be included in the new version of this plugin than you can use this tab.

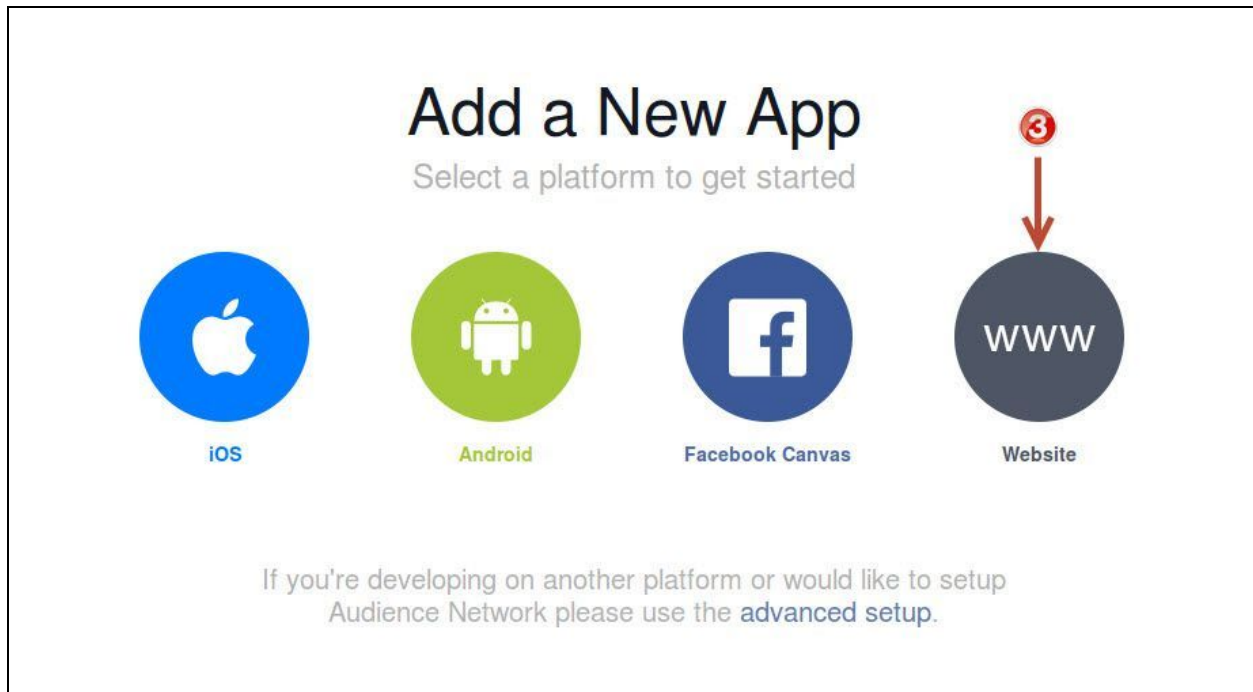

Other Plugins Tab

This tab redirects to our developer page having list of other plugins developed by us. If you like this plugin than you can try our other plugins as well.
